

# Project Engineer

**FimusKraft is a cleantech start-up company working in the areas of biotechnology and circular economy. Our products are reducing or eliminating carbon footprint and producing bio energy and circular economy raw materials from various kinds of biowaste sources. FimusKraft is a European Innovation Committee’s “Seal of Excellence” company.**

In this role as Project Engineer, you will be involved in developing the fast-growing international business, sales, and marketing. First you need to be participating more in marketing and sales, later your responsibility is more in project management.

## Your responsibilities

- Analyzing different market areas and customer needs and their suitability to FimusKraft’s products and business.
- Attending and organizing trade shows and events in which FimusKraft is presenting the products and services
- Keeping up and maintaining customer relations
- Answering customers technical questions with the help other technical experts
- Assisting in project commissioning and customer training at customer site

## Your background

- Master’s or bachelor’s degree in environment or biotechnology or similar
- Good understanding of customer service, sales, and marketing (B2B)
- Couple years working experience in marketing, sales or project management is required
- A collaborative, solution-focused approach, teamwork oriented with strong communication and customer relationship-building skills
- Available to travel.
- Fluent in written & spoken English & Finnish is required, Spanish is advantage, other languages are appreciated
- Capabilities in digital marketing
- Proficient in using MS software

## What’s in it for you

- Opportunity to work for saving our environment
- Opportunity be part of the innovative and extremely professional international team
- Opportunity to enlarge your professional area

## Application
